# TO THE TRADE

ATALOGUE 15 is no doubt the most complete of its kind illustrating an up-to-date variety of designs in electric and combination chandeliers and lighting effects. We have endeavored to compile this catalogue in the most practical form so as to make it very convenient in furnishing estimates on complete installations. You will note that all trimmings are listed separately under their respective stock numbers and at per each price, enabling you to figure on any changes that may be necessary in meeting the requirements.

Our art glass studio is complete in every detail which places us in a position to furnish artistic effects as well as making to order art glass shades and domes according to designs furnished.

We guarantee all fixtures to be perfect in material and construction and will make good any unnecessary expense you are put to through any fault of ours.

Will furnish special designs upon application, giving us full information as to about what is required.

Soliciting your many inquiries, we remain,

Respectfully,

**R. WILLIAMSON & COMPANY**

# Avoid Errors by Observing the Following Rules and Instructions

WRITE YOUR ORDERS PLAIN AND LEGIBLE

## RULES

1. In ordering goods give specific description and always order by catalogue number and number of plates and state whether goods are to be shipped not wired, wired or complete as shown except lamps. If no mention is made of this, goods will be shipped as wired but not assembled. Do not use the words "same as last." Do not tear out cuts or mutilate catalogue.

2. State distinctly how the goods ordered are to be shipped, whether by *freight, express, mail* or otherwise. If there is any preference for a certain route, it should be mentioned in the order. If possible give name of Express Company or Railroad Company on whose line your town or city is located.

3. Great care is used in filling orders promptly, packing goods properly and obtaining receipts from carriers for delivery in good condition. We cannot, therefore, be responsible for goods damaged or lost in transportation. All possible precautions, however, will be used to prevent injury or delay and if requested shipments will be traced. When goods are received in bad order, notify the carrier at once.

4. All claims concerning the shipment of goods must be made within three days from their receipt, and should be accompanied by the packing slip which is forwarded with each shipment. Errors will happen; report promptly in detail for quick adjustment.

5. When referring to orders always give number or date of your order.

6. Do not return material of any kind without first communicating with us and obtaining, first: Our approval for returning goods; Second: The proper shipping directions.

7. All returned goods must be plainly marked with the name and address of the sender, and proper notification of shipment with copy of shipping receipt must be sent to us. Great care should be used in packing goods properly which are to be returned.

8. The prices contained herein supersede all former prices.

9. Orders from persons unknown to us should be accompanied by draft or Chicago references, or if desired to be sent C. O. D., an amount sufficient to cover express or freight charges.

10. Boxing, casks and barrels are charged extra.

11. Prices subject to change without notice.

12. Orders and contracts accepted subject to strikes, fires, unavoidable delays, etc., beyond our control.

13. This catalogue is loaned you, subject to our recalling it. Do not mutilate or lose possession of it. Register number 908.....

## TERMS

Our terms are 30 days net cash to purchasers known to us, and unless your financial standing is known to us or you are rated satisfactory, references should always accompany your order. When this is not done, delay of three or four days is sometimes necessary, before a commercial report can be procured. This delay may cause you inconvenience. Chicago references preferred, as information can be obtained at once.

**ACCOUNTS** are *due* and *payable* upon the 15th of the month following the date of purchase, and unless remittance is received, are subject to *sight draft* without notice.

**C. O. D.** shipments cannot be made unless a deposit is received with the order large enough to cover transportation charges both ways. Goods may be forwarded by freight with sight draft attached to bill of lading, or by express, cash on delivery.

# INSTRUCTIONS

**ELECTRIC SOCKETS** are not included in price of fixtures only when ordered complete as shown except lamps. We advise the use of Hubbell pull sockets where practical.

**ELECTRIC LAMPS,** not included in price of fixtures except on such fixtures as designed for special lamps. When ordering name system, candle power and voltage.

**ELECTRIC SHADE HOLDERS,** (staple) not included in price of fixtures only when ordered complete as shown except lamps. All special and fancy holders included as part of fixtures, except otherwise mentioned.

**INSULATING JOINTS** are included with combination fixtures when priced wired. Not included when priced "not wired." Not included with electric fixtures, and if wanted, an extra charge is made for same.

**TRIPODS OR CROWFEET** included with electric fixtures, whether wired or not wired.

Where junction boxes are used in wiring, electric fixtures, must be ordered for same, so that the canopies are large enough and deep enough to cover both junction box and blind insulating joint, and if so ordered, an extra charge is made for the blind insulating joint, and in such cases where it is necessary to alter a canopy to fit junction box, for which an extra charge is made.

**CANOPIES** are made large enough to cover junction boxes and will not be shipped smaller than 4½ inches in diameter, unless ordered otherwise. Fibre insulators for top of canopy not included.

**SHADES, CANDLES OR GLASSWARE** not included in prices except where mentioned.

**WIRING.** Where prices are quoted on electric fixtures or combination fixtures in this catalogue, there will be found three sets of prices in parallel columns. In the first column are prices for electric fixtures without wire, but with crowfeet, and combination fixtures without wire or insulating joints. In the second column are prices for electric fixtures wired and with crowfeet. Combination fixtures wired and furnished with MacAllen insulating joints. In the right hand column are fixtures priced complete except lamps.

Where fixtures are priced wired or complete, the assembling or putting together not included, but approved wire is drawn through the arms and sufficient stem wire and insulating joint included with combination fixtures, and crow feet with electric fixtures. Where fixtures are ordered to be assembled ready for hanging, an extra charge is made.

**LENGTH** of fixtures is determined by distance between extreme points, including electric lamps. When electric lamps extend below fixtures, the length is measured from top of the fixture to end of electric lamp. When sending height of ceiling, measure from end of the gas pipe down to the floor. If no gas pipe, measure from ceiling to floor.

## EXTRA LENGTHENING

Fixtures made longer than regular length will be charged extra as follows

| REGULAR FINISHES | ROUND | | HEXAGON | | SQUARE | |
|---|---|---|---|---|---|---|
| | Not Wired | Wired | Not Wired | Wired | Not Wired | Wired |
| ⅜-inch Brass Tubing, per ft. | $0.30 | $0.40 | $0.40 | $0.50 | $0.50 | $0.60 |
| ½-inch " " " | .35 | .45 | .45 | .55 | .55 | .65 |
| ⅝-inch Casing and Iron Pipe, per ft. | .40 | .50 | .50 | .60 | .65 | .75 |
| ¾-inch " " " " " | .40 | .50 | .50 | .60 | .65 | .75 |
| ⅞-inch " " " " " | .45 | .55 | .55 | .65 | .75 | .85 |
| 1 -inch " " " " " | .45 | .55 | .55 | .65 | .75 | .85 |
| 1⅛-inch " " " " " | .60 | .70 | .75 | .90 | .90 | 1.05 |
| 1¼-inch " " " " " | .60 | .70 | .75 | 90 | .90 | 1.05 |
| 1½-inch " " " " " | .90 | 1.00 | 1.15 | 1.25 | 1.40 | 1.50 |
| 2 -inch " " " " " | 1.00 | 1.10 | 1.30 | 1.40 | 1.55 | 1.65 |

## SOLID BRASS CHAIN LENGTHENING

Silk Cord used in wiring

| NUMBER | | ROUND | | SQUARE | |
|---|---|---|---|---|---|
| | | Not Wired | Wired | Not Wired | Wired |
| 0552½ | 1⅜-inch Link, Regular Finishes, per ft. | | | $1.60 | $1.80 |
| 0553 | 4 -inch " " " " | | | 5.00 | 5.20 |
| 0553½ | 2¼-inch " " " " | | | 1.70 | 1.90 |
| 0554 | 3 -inch " " " " | | | 3.70 | 3.90 |
| 0555 | 2½-inch " " " " | | | 3.00 | 3.20 |
| 0556 | 2 -inch " " " " | | | 2.50 | 2.70 |
| 0557 | 1½-inch " " " " | | | 1.90 | 2.10 |
| 0558 | 1¼-inch " " " " | | | 1.75 | 1.95 |
| 0559 | 3 -inch " " " " | $2.25 | $2.45 | | |
| 0560 | 2⅛-inch " " " " | 1.13 | 1.25 | | |
| 0561 | 1¼-inch " " " " | 1.13 | 1.25 | | |
| 0562 | 1 -inch " " " " | .50 | .70 | | |
| 0563 | ⅞-inch " " " " | .50 | .70 | | |
| 0564 | ¾-inch " " " " | .50 | .70 | | |

If fixtures are wanted to hang any *special* distance from the floor, mention the *length* wanted in your order, otherwise our rules below must be accepted.

As location, size of rooms, varying heights and other conditions make it impossible for rules to govern all cases, we have adopted the following for general use, sensible exceptions to which will be governed by the existing conditions and our judgment, as in the cases of Churches, Public Buildings, etc.

| | | | |
|---|---|---|---|
| Living Rooms—Fixtures to hang from the floor | | 6 ft. | 0 in. |
| Parlors— | " " " " | 6 ft. | 0 in. |
| Libraries— | " " " " (Ordinary) | 6 ft. | 0 in. |
| Libraries— | " " " " (Large Domes) | 4 ft. | 6 in. |
| Dining Rooms— | " " " " (Ordinary) | 5 ft. | 10 in. |
| Dining Rooms— | " " " " (Large Domes) | 4 ft. | 6 in. |
| Dens— | " " " " | 6 ft. | 0 in. |
| Halls— | " " " " | 6 ft. | 4 in. |
| Vestibules— | " " " " | 6 ft. | 4 in. |
| Other Rooms— | " " " " | 6 ft. | 0 in. |
| Billiard— | " " " " | 5 ft. | 6 in. |
| Stores— | " " " " | 6 ft. | 6 in. |
| Offices— | " " " " | 6 ft. | 6 in. |
| Public Buildings— | " " " " | 7 ft. | upwards |
| Churches— | " " " " | 7 ft. | upwards |

**SPREAD**—The Gas spread is measured by distance between gas tips; Electric Spread, distance between ends of lamps. All spread measurements in this catalogue are the electric spread, from point of lamp to point of lamp, except in case of one light pendants, one light lanterns, the spread is the extreme width.

**EXTENSION**—The extension of side wall brackets, etc., is the distance from wall to point of lamp.

**FINISHES**—Fixtures are shipped in the finish mentioned with each, unless ordered otherwise.

| REGULAR FINISHES WITHOUT EXTRA COST. | SPECIAL FINISHES WHICH COST EXTRA | |
|---|---|---|
| Rich Gilt | Burnished Gilt | 20% Extra |
| Brushed Brass | Bright Silver | 20% " |
| Rich Gilt and Satin | Butler's Silver | 20% " |
| Brushed Brass and Black | Oxidized Silver | 20% " |
| Polished Brass | Verd Antique | 20% " |
| Black Iron Finish | Pompeiian Bronze | 20% " |
| Old Brass | Mottled Copper | 10% " |
| Antique Brass | Oxidized Copper | 10% " |
| Matt Relief | Statuary Bronze | 10% " |
| | Steel | 10% " |
| | Nickel | 10% " |

If finish is to match hardware or other trimmings, a sample must accompany the order.

# TO FACILITATE CORRESPONDENCE BY TELEGRAPH THE FOLLOWING TELEGRAPH CODE MAY BE USED

## REMEMBER

In using the telegraph code, that we will always reply in the code. Furthermore, if we have reason to believe that you have a copy of our catalogue, that we will use code in telegraphing you, regardless of whether or not you have used it in your inquiry.

When ordering goods or asking for quotations by telegraph or telephone always confirm same by letter, marking same "comfirming."

| QUESTIONS | ANSWERS |
|---|---|
| MAN—At what price can you furnish? | PEACH—We will furnish you at..... |
| LADY—At what price and how soon can you furnish? | PEAR—We can ship at once at the net price of..... |
| BOY—When can you ship? | PLUM—Can ship to-day. |
| GIRL—Have you shipped order of.....? | APPLE—Can ship to-morrow. |
| BABY—When will you ship order of.....? | PRUNE—Can ship in three days. |
| WOMAN—How soon can you furnish special designs for .....? | ORANGE—Can ship in one week. |
| CHILD—Have you in stock? If not, how soon can you ship? | QUINCE—Not in stock, can furnish in...days.<br>CHERRY—Your order was shipped..... |

| SERVANT—What can you substitute in place of.....so you can ship at once? | OLIVE—We have based quotations on immediate acceptance. |

## DESCRIPTION

POPLAR—One light Bracket.

ELM—Two light Bracket.

FIR—Three light Bracket.

HEMLOCK—Four light Bracket.

CHESTNUT—Five light Bracket.

SYCAMORE—One light Fixture.

CYPRESS—Two light Chandelier.

ASH—Three light Chandelier.

WALNUT—Four light Chandelier.

SPRUCE—Five light Chandelier.

BIRCH—Six light Chandelier.

PINE—Eight light Chandelier.

OAK—Ten light Chandelier.

MAPLE—Twelve light Chandelier.

WILLOW—Fourteen light Chandelier.

EBONY—Sixteen light Chandelier.

CEDAR—Eighteen light Chandelier.

BEECH—Twenty light Chandelier.

HICKORY—Twenty-two light Chandelier.

MAHOGANY—Twenty-four light Chandelier.

## NOTE

We have based the number of lights on electric only; for combination fixtures this same rule applies. Catalogue number describes article.

## SPECIFICATION

CELERY—Wired as explained in catalogue.

CORN—Not wired as explained in catalogue

BEANS—Not wired, *with* insulating joints.

PEAS—With glassware as shown, no sockets

TURNIP—Without glassware.

TOMATO—With blank insulated joints.

SQUASH—Complete as shown, no lamps.

LENTILS—Assembled ready to hang.

RICE—Regular length as in catalogue.

ROSE—Rich Gilt and Satin.

TULIP—Brushed Brass.

LILAC—Old Brass.

DAISY—Oxidized Copper.

PEONY—Mottled Copper.

DAHLIA—Statuary Bronze.

CARNATION—Verd Antique.

CALLA—Butler's Silver.

## INSTRUCTIONS

MAMA—If you cannot fill order in full, ship all you can and let balance follow as soon as possible.

BROTHER—Send by freight, draft attached to bill of lading, through.....Bank.

SISTER—Send by express, C. O. D.

WIFE—Furnish designs at once for building (Describe kind of building.)

HUSBAND—Get goods ready and hold for shipping instructions.

HOUSE—Ship by Adams Express.

HOME—Ship by American Express.

BARN—Ship by National Express.

LOT—Ship by United States Express.

CELLAR—Ship by Pacific Express.

YARD—Ship by Wells Fargo Express.

WATER—Ship by boat.

STOP—Wait receipt of letter before proceeding with order.

## ELECTRIC FIXTURE

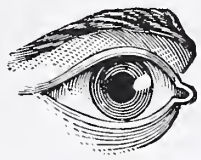
Comfort obtained by the

# "I-COMFORT" SYSTEM



of Indirect Illumination

(Patents Applied for)

TO LIGHT a room by some plan in which the source of light is concealed is acknowledged to be the most comfortable, aesthetic and perfect method. The initial expense and cost of maintenance has heretofore prevented its adoption for general use.

The development work by this company during the past year and the advent of the Tungsten lamp has resulted in the solving of these problems, and this very desirable method of indirect illumination is now commercially available.

In our "I-Comfort" (eye-comfort) system we combine with the highly efficient 60 and 100-watt Tungsten lamp or with upright, high grade, gas mantle burners, *a specially designed one-piece glass reflector with spiral and vertical corrugations, plated with pure silver, giving the most perfect reflecting surface known to science.*

By placing under the brilliant source of light this reflector (artistically incased) the light is reflected to the ceiling with the highest efficiency possible with any reflecting appliance known today. The diffused light reflected from the ceiling evenly distributed throughout the room, gives results that are surprising in efficiency, aesthetic effect, and eye-comfort.

Many eye troubles and headaches are caused by exposing the delicate organs of sight to the direct rays of brilliant modern light sources.

The "I-Comfort" system marks an epoch in interior illumination. It is so comfortable and pleasing that the present common methods seem barbaric by comparison after one has lived with and enjoyed the "I-Comfort" system for a time.

## ESSENTIAL CONDITION

The ceiling must be light in color to make this system feasible. As a matter of fact, the majority of ceilings are light enough to be admirably adapted to this system.

The loss of light by absorption depends upon the color of the ceiling, which should be white or a light tint. It is not essential that the walls should be of a light color, although in such a case the absorption is less.

**No. E401.** Brushed brass
Single chain unit....each, **$11.00**

Elegantly simple design used in center of rooms up to 15x15 feet with 60 or 100 watt lamps.

Two or more in larger rooms or where very brilliant illumination is required.

**E401.** This chain unit is furnished complete wired and with key or keyless socket as desired and with blind insulating joint for ⅜-inch gas pipe. The stem is so arranged that fixture can be readily attached whether the pipe comes even with the ceiling or extends 1½ to 1¾ inches.

DESCRIPTION

Where electrolier wall switches are used, or where both units will always be used, we advise the keyless sockets.

**No. E402.** Brushed brass
Double chain unit .....each, **$27.50**
Used in center of large rooms or where one unit would prove insufficient

**E402** consists of two units, same as E401, except with ceiling fixture similar to cut shown. The design of the ceiling fixture has been changed to give a more artistic appearance. By use of a body of novel construction, the arms can be placed directly against ceiling and after wires are connected the canopy is fastened in place by an ornamental bolt.

**No. E315.** Brushed brass
Each.....**$10.00**

An adaptable unit to be used on fixtures or wherever a pendant socket is already in place on or a few inches from the ceiling.

**E315.** These are ordinarily furnished with the top of the reflector 16 inches below the top of the attachment plug. Furnished with shorter chain where so specified.

## "I-COMFORT" ADAPTABLES

**No. E300.** Brushed brrss, adaptable
Each.....**$5.75**

For use on fixtures already in place, on 45 degree arms of regular electric or combination fixtures.

The ball fitting is so arranged that the unit may be attached in a very few moments without rewiring of fixture.

**E300** consists of equipment as in E305, together with key or keyless socket, stem, separable angle ball. Wired complete ready for installation.

**No. E305.** Brushed brass, adagtable
Each.....**$4.25**

For use on combination or electric fixtures already in use or to be made where the sockets stand perpendicular. Fits all standard sockets.

**E305** consists of a casing or receptacle made with a spinning which fits snugly over an upright socket and one of our E100 reflectors. These are designed for use either on old fixtures with upright sockets or for use on new fixtures.

**No. E310.** Brushed brass, adaptable
Each.....**$5.50**

For use on combination fixtures, the unit being attached to gas nipple. Current being carried from electric socket. Give distance gas jet to electric socket.

**E310** consists of equipment the same as E305, in addition to key or keyless socket as desired, with blind attachment cap to go on gas opening and with side opening so that electric cord can be carried through same. Socket is wired and we furnish 18 inches of silk covered cord and attachment plug.

Above "I-Comfort System" fixtures are furnished wired with key or keyless socket, blind insulating joints, ready for installation, less lamps unless ordered otherwise.

**Fixtures are furnished wired (not assembled) unless ordered otherwise. Glassware, Electric Shade Holders, Sockets and Lamps not included unless mentioned.**

## ELECTRIC FIXTURE

# HOLOPHANE GLOBES AND REFLECTORS

## The Holophane System

The Holophane System of Illumination is based upon well-known optical laws. Glass of particular quality is molded into globes, the faces of which are made up of tiny prisms, which are calculated with the greatest exactness to reflect, diffuse and deflect light rays so that these rays are redirected into useful directions and the intrinsic brilliancy of the light sources greatly reduced. These results are accomplished at the minimum loss through absorption because of the peculiar high grade glass employed. All Holophane Globes and Reflectors are constructed upon variations of this principle, the various results obtained by different globes and reflectors being due to variations in the size, shape, position and kind of prisms employed.

Holophane Globes are made in three classes as shown in the following diagrams:

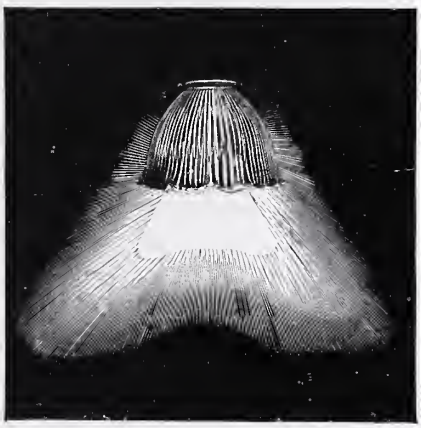
**Class A.** Concentrating

**Class B.** Distributing

**Class C.** Sideways

Class A Globes throw the maximum light directly downward. Class B Globes throw the maximum of light downward at an angle of 45°. Class C Globes throw a maximum illumination at from 10° to 15° below the horizontal.

Holophane Reflectors are also made in three classes, identified as Form E, Form F and Form I, which may be diagrammed thus:



**Form E**

**Form F**

**Form I**

Although Holophane is constructed upon the principle of the optical prism, our product should not be confounded with the so-called "prism glass". The Holophane System is protected by letters pateut and no imitation, unless t be an infringement upon our rights, can be made to give the results we advertise. In all cases the claims made for Holophane Globes and Reflectors are supported by photometric measurements made by the Electrical Testing Laboratories whose tests are published in Holophane Company's data book.

## General Suggestions

The prospective purchaser of Holophane Globes and Reflectors is particularly requested to read and be guided by the following general suggestions as to the selection and application of our goods. We have no hesitation in saying that whenever, in the past, the Holophane product has failed to give complete satisfaction, it has been because of misunderstanding or carelessness in the selection of the proper Globe or Reflector or because of error in installing same.

(1) Never use a pendant Holophane Globe for an upright or *vice versa*. Both classes are identified by proper labels, so that there is no excuse for this mistake. When the wrong globe is used, it throws the light toward the ceiling, thus giving the exact reverse of the desired distribution.

(2) In all cases use lamps *at least* as large as those recommended. Lamps of smaller candlepower than are recommended give a dim and unsatisfactory light. If it is planned to use small lamps, select Globes or Reflectors designed for such lamps.

(3) Be careful in every case to use the holder recommended. A comparatively slight variation of the relative positions of lamps and Globes or Reflectors may entirely change the form of light distribution.

(4) Be sure you get the genuine Holophane. The so-called "prism glass" offered in substitution is not scientifically designed and does not give the illuminating results of Holophane. Our claims are supported by photometric tests of the Electrical Testing Laboratories.

(5) If in doubt as to the proper Globe or Reflector to use for any spepific purpose, consult us. The Engineering Department, Holophane Company, is maintained to assist customers to select and place the proper Globe or Reflector. This Department will also lay out and submit complete specifications for lighting installations of any size. Our wide experience in this work enables us to serve owners, builders and architects as consulting illuminating engineers with complete satisfaction. Such service is rendered without charge.

(6) Each photometric data on any Holophane Globe or Reflector will be supplied on request. Considerable data of this nature is contained in our data book, but blue prints of photometric tests made by the Electrical Testing Laboratories on every Holophane Globe and Reflector are available to all.

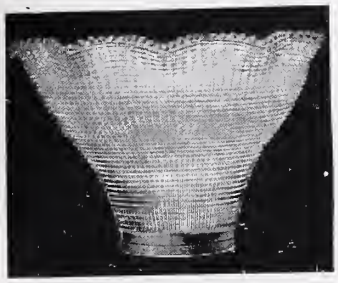
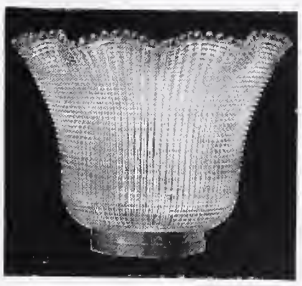
## Globes for Air Hole Mantel Burners



**No. 2481.** Class A. (¼ scale)



**No. 2811.** Class B. (¼ scale)

**No. 2711.** Class C. (¼ scale)

These globes are designed for the Welsbach Universal, Lindsay and other air hole burners. They will fit any standard gallery burner, the neck of the globe slipping over the basket and resting on the ridge outside. The globe should be used with the short or Fi. type of air hole chimney. Similar shapes can be furnished for small neck gallery burners.

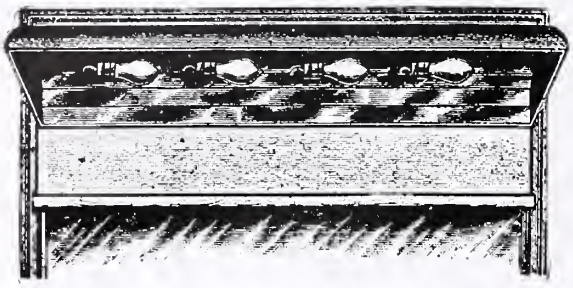
# MIRROR REFLECTORS



**No. 01120.** Window Reflector

Is placed in top of the window and reflects the light down and inward. Can be placed to throw the light at any angle. Covers the entire window with an even light, at the same time the source of light cannot be seen from the outside. Made up in lengths of corrugated glass to suit any window.

| | | |
|---|---|---|
| Not wired | per foot, | $2.25 |
| Wired | " " | 2.55 |
| Wired, with sockets, connected ready to hang, | " " | 3.00 |

We recommend this reflector above all others

As the sockets can be connected very easily at the time of wiring, we suggest that in ordering we furnish the sockets, using one socket to each foot of reflector, all connected ready to put up.

Above prices include flanges for ⅜-inch iron pipe. Clusters, except Type 600, may be furnished with cast iron flange, tapped for ½-inch pipe, or with steel covers adapted for 3-inch or 4-inch outlet boxes.

Diameters given on Types 5 and 5K are of the supporting base only. Outside diameter of cluster is 4 inches.

Series connected Clusters, Types 1½ and 2½, may be furnished at the same price as Type 1, Multiple Clusters.

Separable Wireless Clusters, Types 5 and 5K, consist of two principal parts, separately connected, making it possible to attach or remove body portion or finished part without disturbing wiring connections.

Standard finish is polished brass. Brushed (old) brass, dead black or aluminum metal for Weatherproof Forms, may be substituted without additional charge. Nickel, oxidized or mottled copper at 10 per cent additional.

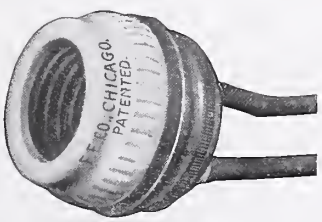
**No. F4.** Cover with Socket and Shade Holder showing method of attachment

This cover is designed for use where it is desired to put studded lights in ceilings, using something a little more elaborate than the ordinary flat cover and still not as expensive as a regular fixture. Can be equipped with 2¼-inch or 3¼-inch holder for use with glass shades or globes.

4-inch solid brass cover, only, each, list ..... $1.05



**No. F303.** Festoon Socket

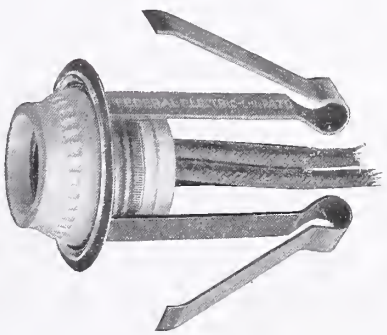
Standard size, Edison base, Weatherproof Socket with clamping ring for attaching shade to the back of the socket

These sockets are designed for temporary outdoor displays, such as hanging festoons on buildings or across streets. They are also especially adapted for use in window reflectors.

When used for festoon work the design is such that a small shade can be clamped to the back by means of the clamping ring. This shade protects the base of the lamp and at the same time keeps it clean.

List Price.

Socket only, standard length leads ..... $0.35
Socket only, 4-inch leads, for outlet box use ..... .32



Spring and Face Plate for use with No. F303 for marble work

Wires are pulled out through the hole in the marble and connected to the socket; socket is then pushed into the hole, being held firmly in place by the spring.

List Price.

Socket, face plate and spring ..... each, $0.89
Standard package, 250

The Tungsten lamps listed above are battery lamps. Note the high candle power on low voltage

**No. 02041**

Represents a combination of candelabra lamp and plain white glass candle tube. Mounted on Standard Edison lamp base. With this combination the candelabra effect can be obtained with any fixture having standard Edison sockets, by merely screwing same into the sockets in place of the regular lamps. Can also be furnished to fit other standard bases.

| | Each |
|---|---|
| Complete, as shown | $3.00 |
| Glass candle tube only | .20 |
| Candelabra receptacle, our No. 02042 | .35 |
| Brass stem supporting candle tube to hold receptacle | .15 |

Always state voltage

**No. 02043**

Candelabra Brass Socket

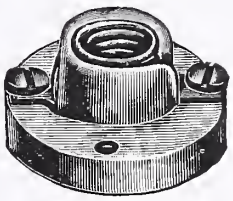
With porcelain insulating parts and fits the candelabra multiple lamps. By the use of these sockets the candelabra lamps may be used on fixtures in place of regular lamps and sockets.

Each..... $0.48

**No. 02044**

Receptacle is made of hard rubber and has insulated wires 5 inches long. Can be used with lamps for Christmas decoration. The wire can be covered with evergreen, etc. Highly ornamental and effective.

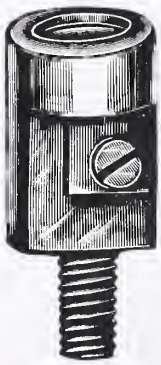
Each..... $0.40



**No. 02040**

Standard Flat Base Receptacle for Candelabra Lamps

Each..... $0.14



**No. 02042**

Standard Round Candelabra Receptacle

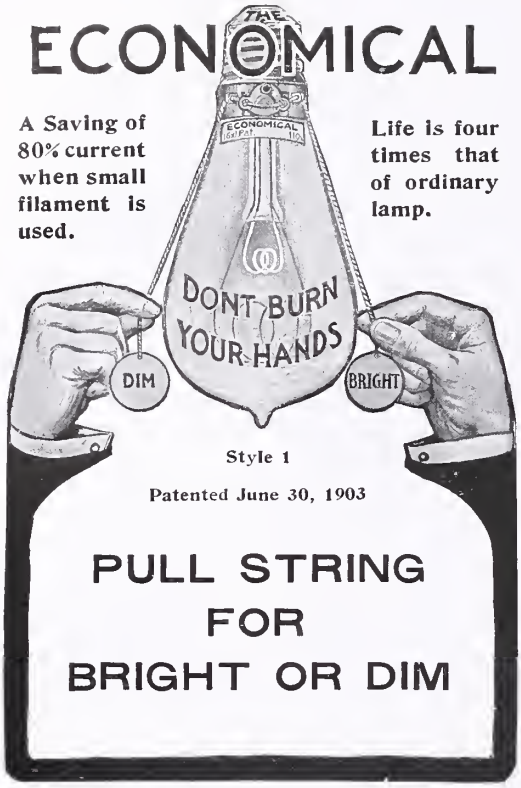
Is used on fixture fitted with glass candles. Is screwed to a supporting piece called candle stem. Is covered with candle tube, concealing same, as shown in No. 02041. Can only be used with candelabra lamps.

Each..... $0.30

Extra charge when fitted to candle stem.

Order by Catalogue numbers

## REGULATORS



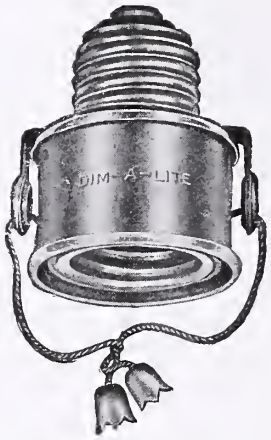
**No. 02036.** Economical Electric Lamp

In all voltages from 50 to 240; made in two sizes; 16 candle power turns down to 1 candle power, and 8 candle power turns down to ¾ candle power. Made in Standard Edison or Westinghouse base.

| Size. | List Price Each |
|---|---|
| 16-candle power | $1.00 |
| 8 " " | .90 |

Also made in Thomson-Houston base at an additional charge of 5 cents each

Always state voltage, size and base wanted



Dim-a-lite Regulating Socket

For any standard 16 candle power lamp

A portable attachment that fits all incandescent fixtures

It is not a part of the lamp and can never burn out

REGULATION: The Dim-a-lite is adjusted for different degrees of illumination simply by pulling a pendant cord for 3 steps or degrees of illumination—"full candle power," "half candle power" and "way down."

SIZE: Body of Dim-a-lite is only 1½ inches in diameter and 1 inch deep. Fits easily inside almost any shade.

| No. | Finish | List Price Each |
|---|---|---|
| **E254** | Black | $0.75 |
| **E255** | Brush brass | 1.00 |
| **E256** | Oxidized copper | 1.00 |

## LAMP GUARDS

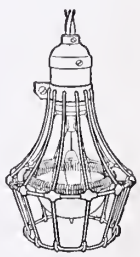
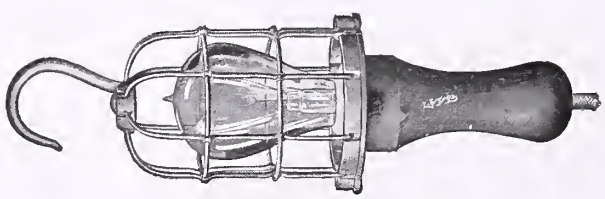
| **E15** | " 32 " " " " | 4.70 |



**No. E14**



Portable Lamp Guard and Holder

Made in two sizes, to take either 16 candle power or 32 candle power lamps. It is especially adapted for use in car barn pits, railroad yards, mines, foundries, breweries, machine shops, mills, etc. Is also recommended for 500-volt work as the socket is thoroughly insulated from the guard, thus obviating any trouble from grounds on railway circuits.

| No. | | List Price Each |

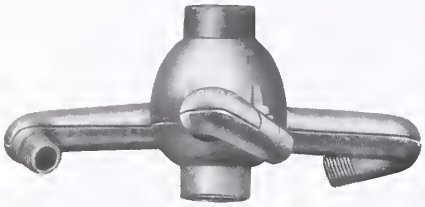
(Too late to classify)

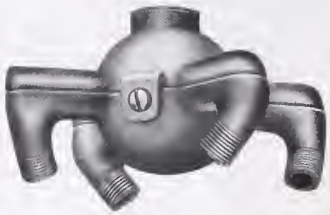


**No. 01163.** For Portables

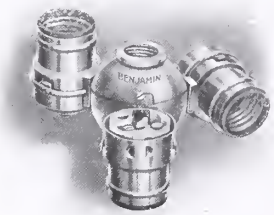
### Williamson's Separable Clusters

| | | |
|---|---|---|
| 2-light | each, | $0 40 |
| 3 " | " | .60 |
| 4 " | " | .80 |

In two pieces for ceiling or pendant dome fixtures and portable lamps. Designed to bunch the lights in small space and compact form. Easily taken apart and wired.



**No. 01164.** For Domes



**No. B853**

### Benjamin Adjustable Plug and Socket Cluster

| No. | | List Price |
|---|---|---|
| B852 | 2-light with ⅜-inch bushing | $1.00 |
| B853 | 3 " " ⅜ " " | 1.30 |
| B854 | 4 " " ⅜ " " | 1.60 |
| B952 | 2-light with plug, wired | $1.25 |
| B953 | 3 " " " " | 1.55 |
| B954 | 4 " " " " | 1.85 |

**No. B952**

For use where it is desirable to adjust and fix the lights in special relation to the sides of the dome or reflector. The socket may be turned to any position between two points 180 degrees apart and locked by means of a screw. Standard finish is polished brass.

**No. H35032**

### Hubbell Ceiling Socket

For direct control of ceiling lights

Designed primarily for the Tungsten lamp and it will sustain successfully the weight of the largest and heaviest lamp and shade. The wide metal base fits flush against the ceiling, holds the socket absolutely rigid, resists vibration and preserves the vitality of the lamp.

**No. H35032** ..... each, $1.00

### "Just Pull" Electric Light Attachment

Clamps over key making a pull socket of any regular key socket. Makes it easy to reach up and turn on light.

# TURNER TORCHES

No. 12

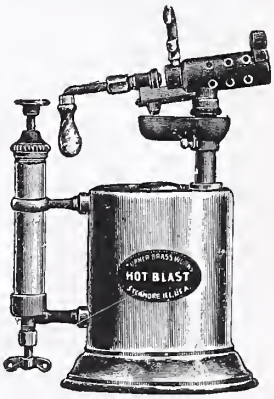
### No. 12. The Turner "Old Reliable" Torch

The "Old Reliable" is constructed of the best quality heavy brass and it is one of the highest grade single jet type of torch made. The filler plug is placed in the top of the tank.

Capacity, one quart. Price each.....$7.50

**No. 15.** "Reliable Combination." Same style as above with hook for soldering iron.

Price each.....$8.00



No. 70

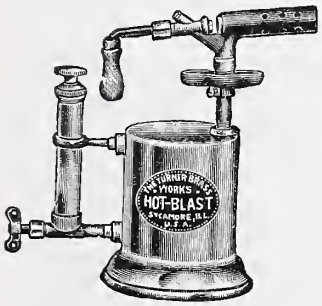
### No. 70. White's Cinch Combination Hot Blast Torch

A quart size torch equipped with modern improved burner. Generates about 2000 degrees F. The tank is made of 18 gauge seamless brass, with concave steel bottom, which acts as a funnel when filling.

Capacity, one quart. Price each.....$7 50

**No. 66.** Firefly. Same style as above without soldering iron attachment.

Price each.....$7.00



No. 23

### No. 23. White's Electric Hot Blast Torch

A pint size torch for electricians, linemen and those who do work calling for a needle flame and a hot one. The generator is made on a new and correct principle, producing a solid blue flame of 1500 degrees F. Tanks made of 18 gauge seamless brass, with corrugated bottoms.

Capacity, one pint. Price each.....$6.50

**No. 54.** Diamond Combiuation. Same style as above with soldering iron attachment.

Price each.....$7.00

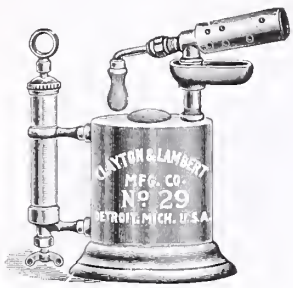
No. 100

### No. 100. The Turner Double Jet Alcohol Blow Pipe

This Alcohol Blow Pipe burns wood alcohol and produces a needle pointed flame of remarkably high temperature; excellent for all kinds of fine soldering, such as is required by Jewelers, Opticians, Dentists and Electricians. The double jet construction of the burner generates the maximum degree of heat from the fuel—over 3000 degrees F. The flame is perfectly clear and non-oxidizing and we especially recommend it for storage battery lead burning and similar work. The burner is swiveled so that it can be turned in any position, making it a handy tool for the electrician and general mechanic, and compact for carrying in the tool bag.

Capacity, one pint. Price each.....$10.00

## "C. & L." TORCHES



**No. 29.** Torch. Quart Size

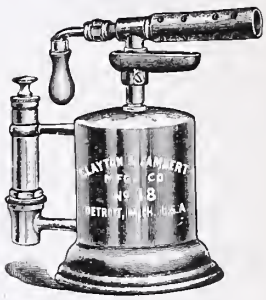
This is a popular priced torch. The pump which is in the handle, is fitted with an automatic check valve, and a safety air tube runs from the bottom of the handle to the top of tank above the gasoline, so that it is impossible for gasoline to get into the pump. Every part of this torch is given close inspection, assembled with great care and thoroughly tested.

**No. 30.** Torch. Quart Size

A convenient and hook support on the burner of No. 30 enables the use of soldering coppers. In other respects the torch is exactly like the No. 29.

| No. | Price Each, Polished Brass |
|---|---|
| **29** | $6.50 |
| **30** | 7.00 |

Pump in handle having check valve actuated by springs, doing away with the old and, at times, unsatisfactory stop cock valve. The bottom handle casting is made with a recess in which the check valve works automatically. An air tube is attached to the lower handle casting, through which the air is taken to the top of the tank, above the gasoline. This makes it impossible for gasoline to get in the pump. A double-shouldered needle is used, affording quick and positive adjustment.

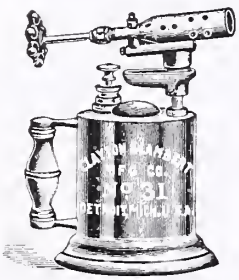


**No. 18.** Torch. Pint Size

**No. 19.** Torch. Pint Size.

No. 19 is like No. 18, with the exception of the burner, it having hook and support for holding soldering coppers, a desirable arrangement for repair men.

| No. | Price Each, Polished Brass |
|---|---|
| **18** | $6.00 |
| **19** | 6.50 |



**No. 31.** Torch. Quart Size

This quart torch makes a perfect fire, whether employed indoors or out, in hard wind or extreme cold. A surprisingly small amount of gasoline is required compared with the results obtained in hea efficiency.

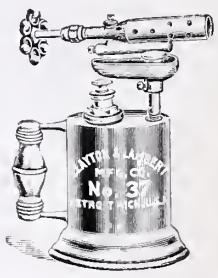
**No. 32.** Torch. Quart Size

No. 32 has every feature in construction and finish found in No. 31, with the added advantage, for repair men, of a hook and support on the burner for holding soldering coppers.

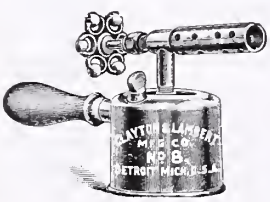
| No. | Price Each, Polished Brass |
|---|---|
| **31** | $7.50 |
| **32** | 8.00 |

The No. 37 is fitted with our latest improved burner which protects the gas or vapor from the wind or cold, making it possible to keep the flame blue, and positive in heat intensity in almost any extreme of wind or weather, and uses but little gasoline. Patent automatic air pump with check valve, is used, insuring the desired air pressure at all times.

| No. | Price Each, Polished Brass |
|---|---|
| **37** | $6.50 |



**No 37.** Torch. Pint Size



**No. 8.** Torch. Holds ½ Pint

The tank used on the No. 8 Torch is made of a solid brass casting, fitted with cast bottom, which screws to place and is then brazed. It will withstand an enormous pressure. The handle is adjustable, permitting holding in any position.

The torch requires no pump, as it generates its own air pressure by heat.

The burner, produces a clear blue blast flame, using very little gasoline.

The No. 8 is a beauty—one of the nicest finished torches made.

| No. | Price Each, Polished Brass |
|---|---|
| **8** | $6.00 |

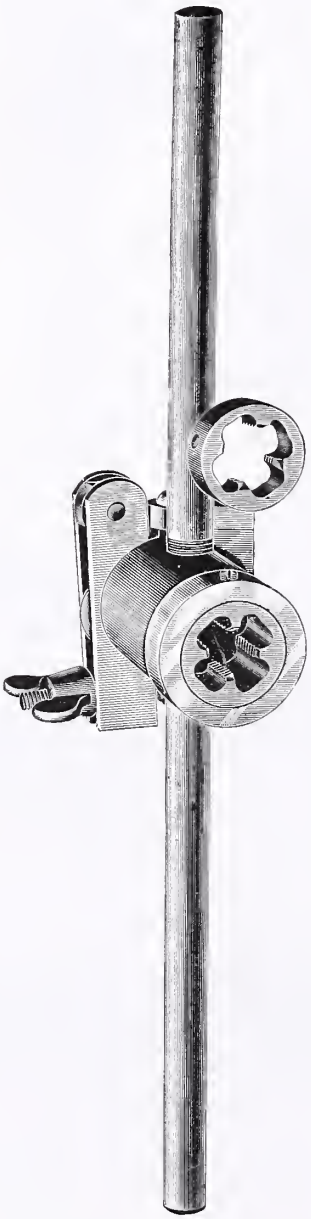
## STOCKS, TAPS AND REAMERS

### OUTLET OR DROP CUTTER

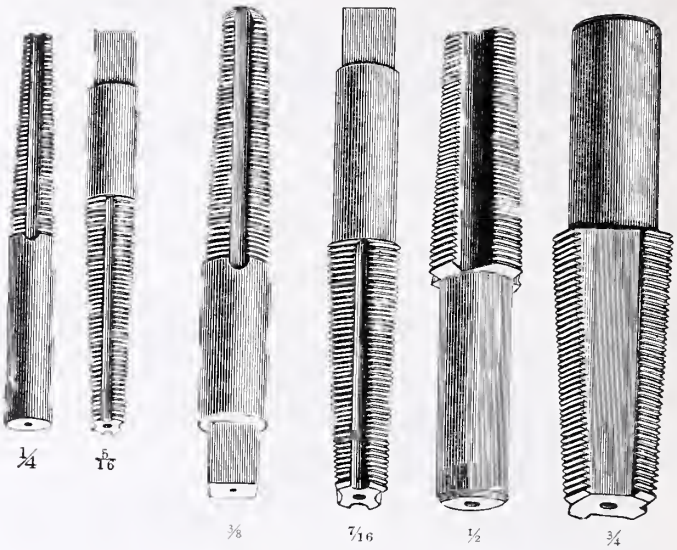


**No. 0780½.** Williamson Die and Cutter

Two tools in one. They save time as a bench tool and for cutting off drops and re-threading same. They are the only tools of this kind which are reliable. They will cut off a drop one inch from ceiling and thread it.

When electric fixtures are to be hung on long drops this tool will shorten the drop and make a first-class job. Cuts ⅜ or ½-inch iron pipe.

Each.....$20.00



**No. 0793.** Taps for Brass Thread

| | | | |
|---|---|---|---|
| ¼-inch | each, $0.65 | ⅜-inch | each, $0.85 |

# IMPORTANT!

For the convenience of those who find it necessary to figure the various changes in the trimmings of fixtures you will find our method of pricing a practical and correct system.

The list prices on all trimmings as illustrated on each fixture, pendant, bracket and ceiling light, consisting of sockets, holders, Holophane glassware, etc., are so arranged as to come under the chandelier discounts.

If trimmings are ordered separately, same will be priced according to their respective classification and list prices and subject to the discounts as per discount sheet furnished with this catalogue or upon application.

We also call attention to the fact that all trimmings, such as electrical supplies and Holophane glassware, are listed under the manufacturers' number and regular list prices and subject to their regular terms and discounts as quoted to the trade in general by the various manufacturers and jobbers of such goods, thereby enabling you to concentrate your purchases without loss of time or extra expense.

X-Ray Reflectors ..... 515-516

**THIS last page gives us an opportunity to call particular** attention to our facilities in manufacturing lighting fixtures and supplies. We occupy our own building, six stories and basement, consisting of 130,000 square feet of floor space, all of which is devoted exclusively to the lighting fixture business.

Our growth has been gradual and healthy, and the success we attribute to the trade in general. The reason, no doubt, lies in the fact that the TRADE appreciates "Good Goods and Trade Protection." This is our motto.

The catalogues which we have issued do not embrace our entire line, therefore special lighting fixture work, that cannot be taken care of through a selection from catalogues, should be referred to us, by giving in detail as near as possible what the necessary requirements consist of. Upon receipt of same we will submit special designs and net prices.

If a prospective customer contemplates coming to Chicago to make a selection of lighting fixtures, we would suggest furnishing party with a letter of introduction so stating the facts, thereby assisting us in meeting the requirements.

We also extend to you a visit through our factory and show rooms.

Thanking you and looking forward to your many orders, we remain,

Respectfully yours,

R. WILLIAMSON & CO.
